Waterproof reversible gilet

Teflon treatment used on the product forms a barrier around each fiber. This protection reduces the rigidity of the product, while allowing liquid to slide off the product. Water drops, oil stains do not penetrate the fibers of the garment through this barrier. Result, liquids slide off and stains are easy to clean. On the other hand Teflon offers quality softness and comfort as well as respect of the sports movement. Lightweight microfiber reversible vest with teflon treatment to make it waterproof. Perfect for morning and evening cold temperatures.

Large zip pockets on the inside and outside of the jacket. Soft fleece lining.
